12.	On page 13, see footnote, the solicitation provides FAR 6.101(a) guidance regarding the offerors' naming of specific persons substantially involved in the development of the scope of work for the activity. Does this provision also apply to firms	It is up to Offerors to recognize and identify conflicts of interest and avoid them.
13.	involved in the design of the scope of work? For monitoring and evaluation purposes: are "job matches" (referenced on section C.3, page 13) interchangeable with jobs created?	No. Job matches are not part of jobs created.
14.	On page 15 of the solicitation, a theory of change is provided for the project. Is this TOC prescriptive for all offerors or are offerors free to develop their own TOC for this project?	Offerors are free to develop their own TOC as long as they respect the approach required for LED.
15.	Should offerors consider activities for micro- enterprises in this project?	Up to offerors to decide.
16.	There are two references to fee in Section C of the RFP, but no specific instructions are given elsewhere in the RFP. Would USAID please provide further details on these references?	The Section C is revised to remove references to the fee.
	 The references are: a. Page 16, C4, Objective 1 "the Contractor can receive a premium if more than 35% of the jobs created are for women on the condition that the Contractor reaches the target for the total number of jobs created". b. Page 16, C4, Objective 1 "The Contractor will have a fee system tied to the number of jobs created". 	
17.	RFP pp. 16, C.4 Objectives, Objective 1, states that the Contractor will have a fee system tied to the number of jobs created. Can USAID clarify that this fee system is different from the fixed fee explained in Section B.5, and relates to fee for client sales and job generation?	See A.16
18.	Under Section C.4, page 16, the RFP states "the Contractor and its business advisors may be incentivized based on the numbers of jobs created and the percentage of jobs created for women." Does this imply variable compensation for the Contractor? No variable compensation for the Contractor was described in the RFP.	Section C.4, Objective 1, page 16 has been amended.
19.	Section C page 17 provides a "FTE job creation targets" table under expected results. However, section L page 97 states that "Offerors shall propose the number of jobs to be created per year disaggregated by new and continuing jobs (for base and option years). salary increases of no more than 4% cumulatively. This restriction may preclude offerors from complying with AIDAR 752.7007, incorporated by reference in RFP Section H.7, which states that, "Direct compensation of the Contractor's personnel will be in accordance with the Contractor's established policies, procedures, and practices, and the cost principles applicable to this contract." Specifying the annual salary increase offerors can	
provide their staff may result in offerors deviating from AIDAR 752.7007. Would USAID revise the annual salary increase percentage to state "to be determined," thereby allowing offerors to submit cost proposals in accordance with their established policies, procedures, and practices? 39. Section H.8(d) states, "Annual salary increase (of any kind cost of living, merit, promotion increase, or any other type) of not more than 4% cumulatively	
may be granted after the employee's completion of each twelve-month period of satisfactory services under the contract." Specifying the maximum amount for annual salary increases may result in offerors deviating from AIDAR 752.7007. We respectfully request that USAID remove the restriction of a not more than 4% annual salary increase, thereby allowing offerors to submit cost proposals in accordance with their established policies, procedures, and practices. This also allows offerors to comply with page 16 of the RFP, which gives the contractor the flexibility to propose a performance bonus system for LED business advisors.	
40. On pages 48-50, section H.8: We respectfully request that this section be deleted and that the Contractor's policies/procedures take precedence in compliance with Section H.7. Otherwise, we request the following changes to Section H.8: a. H.8(d): Please delete "promotion" from H.8(d) as a promotion signals a change in responsibility, essentially a new job, which could come at any time and is inconsistent with "annual" increases and our understanding of USAID's justification for limitations. b. H.8(d): We respectfully request that the 4% annual increase be changed to 6-7% as inflation projection models are forecasting not less than 6% over the life of the project and an annual increase of less than 6% could progressively lower staff's standard of living	

	c. H.8(e): We request that either the Pay Scale or

	special factors. Grants require significant effort to	
	administer and carry risks for the contractor.	
	Additionally, the statutory underpinnings of fixed fee	
	at 10 USC 2306(d) and 41 USC 254(b) discuss fee	
	definitions and limitations in terms of total estimated	
	cost, which would include grants in this case. Given	
	this, we respectfully request that USAID reconsider	
	its agency pre-negotiation fee objective of zero	
	percent on grants, and allow offerors to charge a	
	fee that considers grants under contract as a part of	
	the total estimated cost.	
62.	On page 105, Cost Proposal Instructions, (G)	Please see A.61
	Grants under Contract, the solicitation states that	
	"fees will not be allowed for grants under contracts".	
	Most prime contractor field audit findings involve the	
	imputation of grantee financial management failure	
	of one kind (fraud) or another (inability to provide	
	records in sufficient detail to reconcile expenses	
	against advances) to the prime. This is an inherent	

	risk in working with grantees in a development context and that risk should be reflected in a de minimis fee. Also, by asserting that no fees will be allowed, the complementing guarantee of an LOC for the grant funds should be offered to mitigate the cost of forward funding the grants which otherwise would be reflected in the fee. Furthermore, organizations treat GUC costs differently in their approved indirect cost structures, from pass-through no load structures to fully burdened structures. Those structures were likely designed with an ability to assess fee and therefore prohibiting fee could have varying and therefore discriminating impact across the potential offeror pool. As such, we respectfully request that the prohibition against "fee" be deleted.	
63.	Please confirm that the GUC amounts listed on page 64, section H.37 are inclusive of applicable GUC fees.	Please see A.61
64.	Page 105 of the RFP states that "Fees will not be allowed for grants under contracts." Would USAID issue a letter of credit for advance payment to grantees?	Please see A.61
65.	Section L.13 (e) (G) of the RFP, Page 105, states "Fee will not be allowed on grants under contracts." We respectfully request that USAID consider allowing Offerors to propose a separate fee ceiling to be applied to the cost of grants under contract to ensure that we are able to recover the cost of capital required for implementing grants under contract.	Please see A.61
66.	In reference to grants under contract, Section B.4, Section L.13(e)(2)(G) state that fees will not be allowed for grants under contracts (GUC). This appears to be inconsistent with FAR 15.404-4 and ADS 302.3.6.9 that state that pre-negotiation fee objectives must be determined according to a structured approach that considers contractor effort, risk, and other special factors. Grants require significant effort to administer and carry risks for the contractor especially given that GUC are often awarded to nascent organizations that might not otherwise qualify for a direct USAID award. Given these factors and the regulatory citations, we respectfully request that USAID reconsider its agency pre-negotiation fee objective of zero percent on grants, and allow offerors to charge a fee that is reasonable and consistent with federal regulations.	Please see A.61

Would USAID kindly reconcile the overlap between the instructions for the SOQs and CVs, specifically: Would USAID allow the SOQ to replace the candidate CV given the duplication of information? In reference to the above question, if both CVs and SOQs are required, would USAID confirm that the page limits cited (3 pages for each key personnel and 2 pages for each technical expert) apply to the SOQs only? And in that case, would USAID provide a page limit for the CVs? In reference to the same question, the RFP states that SOQs are exempt from the 20 page limit.
